Dear Professor Ferrater Mora,

In reply to your recent letter, Professor Kockelmans asks me to write you that we can indeed accept one or two interesting articles per year in Spanish, and that we have just had printed Deano's article La Evolucion de la filosofia de Wittgenstein in Vol III, no. 2., to appear shortly. As to the choice between the two articles you have on hand, ie, that of Costa and Presas, the decision would be left to you on the basis of merit.

The journal might incline towards the Heidegger article, but again, the choice lies with you. Thank you for your consideration, as always. Perhaps you might keep on hand the Hume article for future consideration should it deserve the reading...rather, the one you don't pass on now, be it either one.

Sincerely,

David B. Allison  
Corresponding Secretary
