Dear Professor Ferrater-Mora:

I didn't get the chance to say that your paper at Purdue was one of the very few which had been carefully worked out and equally carefully constructed. I found the suggestions toward an ontology interesting and to the point. Since I believe you said that the paper was a part of a larger work, I look forward to seeing the whole.

I enclose a little essay of mine which I believe gives an account of an instance of your ontology.

Sincerely,

John M. Anderson
