Professor Jose Ferrater Mora
Bryn Mawr College

Dear Professor Ferrater Mora:

Enclosed are the page proofs of The Idea of Man. I have a copy also, and if you find this in order you need not send it back. I have marked the few places where mistakes were made in resetting from the galley, and these will be taken care of; the Greek on page 9 is too weak and I will have a new block made for that. There were two or three places where very minor changes had to be made in the wording; I thought it better to do that before the manuscript got to page proof, but of course if there is anything does not meet with your approval we can still have it changed.

With warm regards, in which my wife joins,

Sincerely yours,

Peter Cant
