May 21, 1951

Professor J. Ferrater Mora
Department of Philosophy
Bryn Mawr College
Bryn Mawr, Pennsylvania

Dear Professor Ferrater:

Thank you for your letter of May 19th, and especially for your promise to have a review copy of your Diccionario de Filosofía sent to me when it is ready.

Since you have copies of the numbers of Notas y Estudios de Filosofía and Asomante I would appreciate it very much indeed if you could let me have these for a brief time, as this would enable me to check that all details of our references are correct and to make the proper entries in our records, in particular notations as to the subject indexing for our next quinquennial index of reviews by subjects. It would take at most a week to do this, probably less, and I would certainly see that the periodicals are returned to you within that time. From the descriptions of the articles in your letter, it seems to be clear that they should not have separate reviews but should rather be listed by title in the Journal with a notation to the effect that they duplicate, with minor changes, the corresponding articles in the Diccionario. If the publication of the Diccionario is not delayed, it might be convenient for the reader to insert the listings of these two articles immediately after the review of the Diccionario.

The exact reference to the paper of Zubieta is as follows:

Gonzalo Zubieta R. Sobre la substitución de las variables funcionales en el cálculo funcional de primer orden. Boletin de la Sociedad Matemática Mexicana, vol. 7 no. 1-2 (1950), pp. 1-21.

In looking again at the review of Granell's book in the Journal, I see that there is an unfortunate typographical error in the first line of the last paragraph of the review. After the word "assez," the word "ample" should be inserted. This will, of course, be corrected in our next list of errata.

With many thanks again for all your help, I remain,

Very sincerely yours,

Alonzo Church
