

11/18/81

Dear Professor Fenater,

What a pleasant surprise it was to have run into you Friday night, or as the French might say: "comme le hasard fait bien les choses"... Going to the movies is still a favorite hobby, but seeing you truly made my evening.

As I mentioned, I am very happy at MCP + with my studies. My program this term consists of Microbiology, Pathology and Psychiatry. All three are interesting, the Pathology most so. In January, the "Introduction to Clinical and Laboratory Medicine" a.k.a. ICLM begins: I'll finally be working in the hospital and examining patients!

Hope that next time I go to the movies, you'll be in the audience too; so fill them, my very best to you.

Warmly,

Claudia

CSP

P.S. Just in case you don't have my
"coordinates" -- here they are:
