May 9, 1981

Dear Professor Cohn,

A Spanish version of your paper "Building Bridges: Ferrater Mora's Theory of Meaning and the Continuum" will appear in the first issue of Teorema XI (1981). This issue will be distributed between last week May and first week June and you will receive several copies of it.

The English original version will be included in a supplementary issue dedicated to Ferrater's thinking to appear also before end of 1981.

I am very sorry for my extraordinary delay. But this year has been specially hard from the burocratic point of view, for me and for Teorema, because the moving of both to Madrid. The new address of Teorema is: Teorema, Apartado 61.159, Madrid (Spain). At least, I believe that this delay has not affected to the date of publication of your paper.

Sincerely

M. Garrido
