My dear Mr Faust

The little cart has this week safely arrived, I will take the greatest care of it & send it back as soon as ever that I can get the stones moved but 2 new developements have occurred both which are most upsetting one I have to go to England for business for 3 weeks in the end of Oct so I am nearly off my head with work to settle everything before I go, secondly Rudolfe today told me that he was leaving in 2 weeks, he cd not even give me a proper notice, really people are too fantastic these days & no one seems to know how to behave properly, he has had a real holiday here no one has interferred with him at all, he is starting on his own, he is really very good indeed at his seeds & cuttings. but is lost in a big garden as this is, from a practical point of view as he is a pure botanist in spirit, I was personally more then content with him as he did the nursery beautifully which was I wanted but I think that did not suit him so there i am in a mess again with the nursery, with the rest of the garden I am all right & have a good man but I am frightfully worried about the nursery as I have a huge collection at the present time, everything you gave me is well growin g, when I get back I am coming over in a friends car & bringing you here by force !!!!! Now I want to know do you want any special books from England as I shall be delighted to bring you any you want as long as you write exactly whatyou want, please let me know soon. again all thanks for the loan of the cart you are very good. if you know or hear of any man that is good at cuttings & seeds do think of me it is a creature that I fear does no exist in Spain !!!!!!! again so many thanks let me know about the books

yours very sincerely

Dorothy de Woevodsky
