March 29 '71

Don Dr. Ferriter,

Thank you for your letter of March 27.
I can appreciate your suggestions,
which both James and I share, and
your interest in psychochemistry.

I am, of course, well acquainted
with the uses of drug therapy in cases
such as James', and whereas I
see nothing to suggest drugs
would be of use (or I would have
used them already) you are
certainly free to seek a consultation
with Dr. Myer Mendelson.

The appropriate "protocol" is for
you to contact Dr. Mendelson your-
self, inform him you have informed
me, and then let him set up the
consultation as he wishes. You will
have my full cooperation of course.

Yours,

J. A. Burland
