Dear Professor Ferrater Mora:

If by any chance you still have a spare reprint of your article in Philosophy and Phenomenological Research for March 1955, "Peirce's Conception of Architectonic and Related Views," I would be very grateful for it. I would also welcome reprints of any other articles in which you have dealt with Peirce. I am at work on a biography of Peirce, and, in that connection, am preparing a bibliography of writings about him and his philosophy.

Sincerely yours,

Max H. Fisch
