

28 October 1968

Dear Professor Ferrater Mora,

As you know the Bryn Mawr catalogue has me down for "history of chemistry" next semester, whereas I shall in fact be giving a seminar on "approaches to the social history of science". I'd therefore be grateful if you would circulate copies of the enclosed brief outline to interested graduate students in history, philosophy etc. The notice asks for response (either to you or me) by December 11, so we shall have some idea where are up to before the meeting on December 14.

Yours sincerely,
[signatura]
