J. M. Ferrater
1518 Willowbrook Lane
Villanova, PA 19085

Dear Mr. Ferrater:

Greetings from Mount Laurel, New Jersey. Tans are fading, but I hope your summer has been as exciting as mine. While you were unpacking from your vacation, we've been busy with the final touches on the two newest additions to our laboratory.

The 7247-7293 Negative Processor is now in full operation. Film is processed daily at a cost of .085 cents per foot and .115 cents for dailies.

With our state of the art Liquid Gate Printer we can also assure you of the highest quality prints available in the industry. All film types (internegative, color positive, ektachrome, etc.) can be printed liquid gate at an additional cost of .075 cents a foot per roll.

By using our convenient center city Philadelphia pickup and delivery point at 1728 Cherry Street, you can also eliminate the high cost and worry of shipping and long distance telephone calls. To insure prompt service, our messenger will make pick-ups and deliveries twice daily.

For more information about our comprehensive array of laboratory services and a tour of our facilities contact Tom Pilog or myself. In New Jersey dial (609) 778-1600, from Philadelphia (215) 925-6017.

Sincerely yours,

Art Spieller
Laboratory Sales Manager
