

January 8, 1972
348 Payson Rd
Belmont, Mass.

Dear Professor Ferrater Mora,

As you will see from the enclosed "tentative program" our 2nd Intern. Conference is definitively settled for Sept. 1972 at St. John's University. New York is an excellent place for such a gathering.

To secure a concentrated and constructive debate we propose it in great lines [*il-legible*] by the concentrations of problems treated in the papers, secondly by the most successfully, by the initiative of the chairmen of the sessions.

I believe that we could profit from your knowledge in particular, should you accept to preside the first session which outlines all the major issues to be treated in the subsequent ones.

I hope that you will honor us by your acceptance. If you do, we could may be, meet in the near future and make a procesal of the papers to be read.

With best personal regards

Yours

[signatura]

PS. The papers, debate, your short [*il-legible*] etc. will be published in the vol. III of the ANALECTA HUSSERLIANA.
